PROFESSIONAL SUMMARY

Dynamic and entrepreneurial IT Manager with 9+ years of progressive experience spanning enterprise network architecture, healthcare IT management, cybersecurity, multi-site infrastructure deployment, and IT business ownership. Founder and Managing Director of Oyibi TechFix an active IT services company providing consulting, network management, CCTV installation, and digital solutions to clients across Accra. In corporate roles, proven ability to deliver major IT projects entirely independently including a full greenfield branch deployment in Tamale and a 5-branch enterprise network expansion supporting 100+ users and 200+ devices using Fortinet FortiGate 90G NGFWs, Ubiquiti UniFi Cloud Gateway, Mikrotik Router Board, D-Link managed PoE switches, and Hikvision NVR surveillance. Direct healthcare IT experience managing complete infrastructure for Providence Medical Centre (Annex), Koforidua. CCNA certified with credentials in Azure Fundamentals, Network Security, Cybersecurity, and Web Application Penetration Testing. A technically deep, commercially aware, and highly self-driven technology professional who gets the job done.

ENTREPRENEURIAL PROFILE

Founder & Managing Director

2020 – Present (Part-time)

Oyibi TechFix — IT Services Company, Accra, Ghana

Oyibi TechFix is Michael's own IT services business, providing professional technology solutions to businesses and individuals across Accra. Active clients include Millinium Guest house and Ablekuma Joma & Drinks Shop.

- Design, supply, install, and maintain CCTV surveillance systems for homes, retail outlets, schools, and hospitality clients.
- Provide IT consulting services advising clients on technology procurement, infrastructure design, and digital strategy.
- Troubleshoot and repair computer networks, workstations, and IT systems for small and medium-sized businesses.
- Develop and manage client websites including the Oyibi TechFix company website.
- Manage complete IT infrastructure for Millinium Guest house - D-Link switches, CCTV, wireless access points, website management, and ISP coordination.
- Manage IT systems for Ablekuma Joma & Drinks Shop - CCTV, workstations, point-of-sale systems, and ISP coordination.
- Manage relationships with IT vendors, service providers, and technology partners on behalf of clients.

CORE COMPETENCIES

- **Enterprise Network Architecture:** Multi-branch LAN/WAN design, structured cabling, Fortinet FortiGate 90G NGFW, Ubiquiti UniFi Cloud Gateway, Mikrotik Router Board, D-Link DGS-1210-28MP managed PoE switches, site-to-site VPN, VLAN segmentation
- **Healthcare IT Management:** Hospital management software, patient records systems, Windows Server, CCTV and access control in live clinical environments

- **Surveillance & Physical Security:** Hikvision NVR deployment and management, CCTV installation for residential, commercial, and institutional clients, access control, time and attendance systems
- **VoIP Telephony:** D-Link DPH-150GE PoE IP phone deployment, configuration, and management
- **Data Centre Management:** Server health monitoring (Windows Server 2022–2025), switch management, lithium UPS backup, data centre infrastructure oversight
- **Printer Fleet Management:** Canon ImageRunner 2206N & 2425i, HP OfficeJet Pro 9013 & 9023 20+ printers across 5 branches
- **ISP & Connectivity Management:** StarLink, Telcel, MTN ISP coordination, data package renewals, uptime management across multiple branches
- **GPS Fleet Management:** Nsoroma GPS system vehicle tracking and management for corporate fleet
- **Cloud & Microsoft 365:** UniFi Cloud centralised management, Azure Fundamentals, Microsoft 365 administration
- **Cybersecurity:** Fortinet firewall management, endpoint protection, vulnerability assessment, web application penetration testing, OSINT, Burp Suite, John the Ripper, ExifTool, Kali Linux
- **Systems Administration:** Windows Server 2022–2025, Active Directory, DHCP, DNS, user lifecycle management, Group Policy
- **School IT Management:** School management systems, computer labs, time and attendance, access control, CCTV for educational environments
- **IT Project Management:** Greenfield branch deployments, network expansions, multi-site rollouts sole lead from planning through commissioning
- **Vendor & Budget Management:** Supplier negotiation, service agreements, IT procurement, technology expenditure management
- **Website Development & Management:** Business website development, hosting management, content updates, ISP integration

MAJOR IT PROJECTS DELIVERED

Greenfield Branch IT Deployment — Tamale Branch

2024 – 2025

Private Manufacturing & Distribution Group | Sole IT Lead — No External Contractors

- Single-handedly planned and executed the complete IT setup of a new company branch from zero covering all infrastructure, hardware, software, security, and connectivity with no external contractor support.
- Installed and configured all workstations, servers, and peripheral devices completing full hardware commissioning and Windows Server OS deployment across the branch.
- Designed and built the branch network laying all structured cabling, installing D-Link DGS-1210-28MP managed PoE switches, and integrating the branch into the organisation's centralised UniFi Cloud Gateway management platform.
- Configured and deployed Fortinet FortiGate 90G Next Generation Firewall setting up security policies, site-to-site VPN connectivity, intrusion prevention, and network segmentation.
- Deployed D-Link DPH-150GE PoE IP phones for VoIP telephony, and installed Hikvision NVR and CCTV camera systems for surveillance.
- Installed access control and time and attendance systems, configuring user permissions and commissioning all physical security infrastructure.
- Configured all business software applications and printer fleet, ensuring full operational readiness before branch launch.

5-Branch Enterprise Network Expansion — Jamestown & Group Branches

2024 – 2025

Private Manufacturing & Distribution Group | Sole IT Lead | 100+ Users | 200+ Devices

- Independently designed and executed a major network expansion across 5 company branches physically laying all network cables, installing and configuring all switching infrastructure, and commissioning the full network with no external contractor support.

- Deployed D-Link DGS-1210-28MP managed PoE switches at all 5 branches, and implemented Ubiquiti UniFi Cloud Gateway for centralised unified monitoring and management of all branches from a single dashboard.
- Configured Fortinet FortiGate 90G NGFWs and site-to-site VPNs across all branches enforcing security policies and protecting 200+ connected devices with encrypted inter-branch communication.
- Coordinated ISP connectivity across branches — managing StarLink, Telcel, and MTN connections and data package renewals for uninterrupted multi-site operations.
- Integrated 200+ devices: workstations, Canon and HP printers (20 total), Hikvision NVR/CCTV, access control, time and attendance, D-Link DPH-150GE PoE phones, and GPS fleet management (Nsoroma system).
- Produced full network documentation including topology diagrams, IP addressing schemes, device inventories, and configuration records for all 5 branches.

CYBERSECURITY PROJECT & PORTFOLIO

Web Application Penetration Test — Mediroza General Hospital 2026

Authorised Educational Assessment | NetworkWalks Cybersecurity Internship (Batch B082)

Full Report: github.com/malavanyo11-source

- Milestone 1: **Authentication Bypass:** Identified username enumeration (High) using Burp Suite Intruder. Exploited unsanitised login field with SQL injection payload to achieve full authentication bypass (Critical) and access restricted patient file directories.
- Milestone 2: **Encryption Cracking**: Cracked weak PDF encryption on three confidential patient lab reports using John the Ripper and wordlist attacks, recovering full file contents.
- Milestone 3 **OSINT & Data Exposure:** Performed robots.txt analysis using Kali Linux curl, extracted PDF metadata with ExifTool revealing a database backup location, and verified a publicly accessible SQL database containing staff PII national IDs, salaries, emails shareholder financial records, and medical data, with no authentication or encryption.

Severity: SQL Injection - Critical | Username Enumeration - High | Data Exposure - Critical | Weak Encryption - Medium

Tools: Burp Suite (Interceptor, Intruder) | John the Ripper | ExifTool | Kali Linux | curl | OSINT methodology

PROFESSIONAL EXPERIENCE

Assistant IT Manager (Full-time) January 2024 – Present

Private Manufacturing & Distribution Group, Tema, Ghana

- Manage all IT operations across 5+ branches leading strategy, infrastructure, security, procurement, and technology projects aligned to organisational objectives.
- Manage enterprise network infrastructure: Fortinet FortiGate 90G NGFWs, D-Link DGS-1210-28MP managed PoE switches, UniFi Cloud Gateway centralised management, and Mikrotik Router Board.
- Configure and maintain site-to-site VPN across all branches using UniFi Cloud Gateway for secured inter-branch communication.
- Manage and monitor data centre infrastructure Windows Server 2022–2025, server health checks, switch management, and lithium UPS backup monitoring.
- Administer Active Directory user provisioning, access controls, Group Policy, software licences, and full account lifecycle management.
- Manage printer fleet of 20 devices across 5 branches: Canon ImageRunner 2206N & 2425i, HP OfficeJet Pro 9013 & 9023.
- Manage Hikvision NVR surveillance, access control, and time and attendance systems across all branches.
- Support D-Link DPH-150GE VoIP telephony infrastructure across the organisation.

- Coordinate ISP connectivity across all branches StarLink, Telcel, and MTN including data package renewals and uptime management.
- Manage GPS fleet tracking for all company vehicles using the Nsoroma GPS system.
- Lead IT procurement sourcing equipment, negotiating service agreements, and managing technology expenditure across the group.
- Prepare monthly IT reports for all branches for senior management review.
- Deliver IT and cybersecurity training to staff across all departments and branches.
- Maintain comprehensive IT documentation infrastructure records, asset registers, licences, and procedures.
- Reduced system downtime by 80% through proactive monitoring, preventive maintenance, and strategic infrastructure management.

IT Manager (Full-time) February 2023 – January 2024

Renajoe Guest House, Tema, Ghana

- Managed all IT operations infrastructure, security, user accounts, software, system availability, and vendor relationships.
- Developed and enforced IT security policies and procedures, ensuring appropriate handling of confidential information.
- Coordinated IT vendors and managed technology procurement to support operational requirements.
- Delivered IT and security awareness training to staff.
- Achieved 99% system uptime through strategic monitoring and rapid incident response.

IT Manager (Part-time) 2019 – 2023

Community 25 School, Accra, Ghana

- Managed complete IT infrastructure for a private school computers, computer lab, printers, CCTV, access control, and time and attendance systems.
- Administered school management software and ensured reliable technology for academic and administrative operations.
- Managed IT vendor relationships and coordinated equipment procurement and maintenance.

IT Support Technician (Part-time) 2019 – 2021

Falcon Systems, Eastern Region, Ghana

- Managed complete IT infrastructure for Providence Medical Centre (Annex), Koforidua a live clinical environment including hospital management software, patient records systems, Windows Server, CCTV, and access control systems.
- Managed IT infrastructure for a private school in Okorase, Koforidua printers, switches, ISP, wireless access points, school management system, computer lab, and CCTV.
- Installed and configured CCTV surveillance systems for retail outlets, schools, homes, and commercial clients across the Eastern Region.
- Managed computer networks using Mikrotik Router Board across multiple client sites.
- Developed client websites and managed vendor relationships and service provider coordination.

IT Assistant (Part-time) 2018 – 2019

Koforidua Technical University, Koforidua, Ghana

- Delivered first-line IT support to staff and students, resolving hardware, software, and connectivity issues.
- Managed user accounts, access controls, and campus network connectivity.
- Maintained computers, laptops, printers, and peripherals, and contributed to IT documentation.
- Assisted with AV equipment setup for academic events and university functions.

KEY ACHIEVEMENTS

- Founded and operate Oyibi TechFix a live IT services company providing CCTV installation, network management, IT consulting, and digital solutions to clients across Accra since 2020.
- Single-handedly built and commissioned a complete greenfield branch IT infrastructure in Tamale servers, workstations, structured cabling, Fortinet NGFW, UniFi Cloud, VoIP, Hikvision CCTV, and access control with no external contractors.
- Independently designed and executed a 5-branch enterprise network expansion physically cabling, switching, and commissioning a 200+ device network supporting 100+ users with Fortinet FortiGate 90G and UniFi Cloud centralised management.
- Managed complete IT infrastructure for Providence Medical Centre (Annex), Koforidua hospital management software, patient records, Windows Server, CCTV, and access control in a live clinical environment.
- Managed IT systems simultaneously across 5 organisations at peak Private Manufacturing Group, Community 25 School, Oyibi TechFix clients, Falcon Systems clients, and Renajoe Guest House.
- Conducted authorised web application penetration test uncovering Critical SQL injection, authentication bypass, and exposed database with PII all professionally documented on GitHub.
- Reduced corporate system downtime by 80% through strategic infrastructure management and proactive monitoring.

EDUCATION

BSc Information Technology 2025

Valley View University, Ghana | Modules: Cybersecurity, Network Administration, Database Management, Systems Analysis

HND Computer Network Management 2021

Koforidua Technical University, Ghana

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Cisco Certified Network Associate (CCNA) - Cisco
- Azure Fundamentals - Microsoft
- Cyber Security -NetworkWalks
- Network Security - Great Learning
- Web Application Penetration Testing - NetworkWalks Cybersecurity Internship (2026)
- CompTIA Security+ - Alison
- Introduction to Information Security

TECHNOLOGY INVENTORY

- **Firewalls:** Fortinet FortiGate 90G NGFW
- **Switches:** D-Link DGS-1210-28MP managed PoE switches
- **Network Management:** Ubiquiti UniFi Cloud Gateway (multi-site centralised management)
- **Routing:** Mikrotik Router Board, Fortinet integrated routing
- **VoIP Phones:** D-Link DPH-150GE PoE IP phones
- **Surveillance:** Hikvision NVR, Hikvision CCTV cameras
- **Servers:** Windows Server 2022, 2025
- **Printers:** Canon ImageRunner 2206N, Canon ImageRunner 2425i, HP OfficeJet Pro 9013, HP OfficeJet Pro 9023
- **GPS Fleet Management:** Nsoroma GPS system

- **ISP Platforms:** StarLink, Telcel, MTN
- **Security Tools:** Burp Suite, John the Ripper, ExifTool, Kali Linux
- **Operating Systems:** Windows Server 2022–2025, Windows 10/11, Kali Linux
- **Cloud Platforms:** Microsoft Azure, Microsoft 365, UniFi Cloud
